International application No PCT/EP2006/000273

			101/112000/0002/0
A. CLASSIFI INV. G	ICATION OF SUBJECT MATTER 601N33/68 G01N33/86		
According to	International Patent Classification (IPC) or to both national classifica	illon and IPC	
B. FIELDS S			
	cumentation searched (classification system followed by classification 12Q	on symbols)	
Documentalio	on searched other than minimum documentation to the extent that so	uch documents are incl	uded in the fields searched
Electronic dat	ta base consulted during the international search (name of data bas	se and, where practical	, search terms used)
EPO-Int	ernal, BIOSIS, WPI Data, PAJ		
C. DOCUMEN	NTS CONSIDERED TO BE RELEVANT		
Category*	Citation of document, with indication, where appropriate, of the rele	evant passages	Relevant to daim No.
X	MURDOCK PAUL J ET AL: "Von Wille factor activity detected in a mon antibody-based ELISA: An alternat the ristocetin cofactor platelet agglutination assay for diagnosti THROMBOSIS AND HAEMOSTASIS, vol. 78, no. 4, 1997, pages 1272-XP008066081 ISSN: 0340-6245 the whole document	oclonal ive to c use"	1-22
X Furthe	er documents are listed in the continuation of Box C.	X See patent fai	nily annex.
"A" documen conside "E" earlier do filing da "L" documen which is clation "O" documer other m	*To tater document published after the international filling date or priority date and not in conflict with the application but clied to understand the principle or theory underlying the invention cannot be considered to be of particular relevance. *E' earlier document but published on or after the international filling date or priority date and not in conflict with the application but clied to understand the principle or theory underlying the invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone which is cited to establish the publication date of another clation or other special reason (as specified) *O' document referring to an oral disclosure, use, exhibition or other means *P' document published prior to the international filing date but later than the priority date claimed *C' tater document published after the international filing date or priority date and not in conflict with the application but clied to understand the principle or theory underlying the cannot be considered novel or cannot be considered to involve an inventive step when the document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document be combined with one or more other such documents, such combination being obvious to a person skilled in the art. **S' document member of the same patent family		d not in conflict with the application but and the principle or theory underlying the ular relevance; the claimed invention ered novel or cannot be considered to ve step when the document is taken alone ular relevance; the claimed invention ered to involve an inventive step when the bined with one or more other such docuplation being obvious to a person skilled
